7:30 a.m. to 1:30 p.m.

- The American Red Cross must collect nearly 13,000 blood donations every day for patients in need.
- Blood products are perishable and cannot be manufactured; they can only come from volunteer donors.
- 16-year-old students are eligible to donate blood with a signed parental consent.
- Cancer patients use nearly one quarter of the blood supply – more than patients fighting any other disease.
- A single car accident victim can require as many as 100 pints of blood.
- A diverse blood supply is important! A patient is more likely to find a compatible blood match from a donor of the same race or a similar ethnic group.
